

Concept Mapping

Instructions

Review the session's content by **defining key terms** and linking them in a **concept map**.

1. Define key terms. Write a brief (~1 sentence) definition of each of the terms below.
Note: key terms continue onto next page.
2. Link terms in a concept map. On the reverse of this page are a series of blank boxes connected by arrows. Each arrow describes the link between the concepts.

Key terms

Term	Definition
'whole' numbers	
integer	
logical	
logical(), integer(), double(), character()	
text	
double	
vector	
seq() or :	
type	

EDS 221 Day 2 AM

Topic: *Data types and 1d structures*

character	
decimal numbers	
true or false	
c()
